Actividad 5 — Verificar el estado de TLS en PostgreSQL

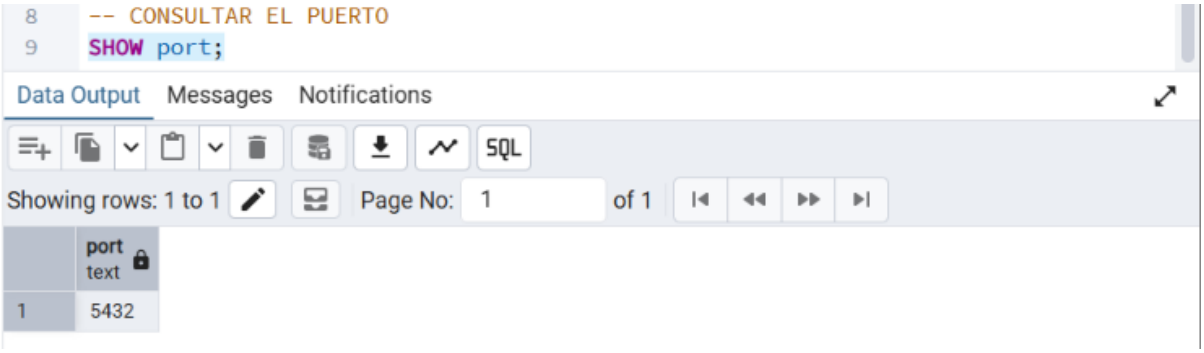

Consultar el estado de SSL:

Ver protocolo (no hay permisos de super usuario)

Ver puerto:

Ver que direcciones escucha

```
10  -- CONSULTAR QUE DIRECCIONES ESCUCHA
11  SHOW listen_addresses;
```

Data Output | Messages | Notifications

Showing rows: 1 to 1 | Page No: 1 of 1

	listen_addresses text
1	*

Verificar la conexión actual

```
12  -- VERIFICAR LA CONEXIÓN ACTUAL
13  SELECT
14      inet_client_addr(),
15      inet_client_port();
```

Data Output | Messages | Notifications

Showing rows: 1 to 1 | Page No: 1 of 1

	inet_client_addr inet	inet_client_port integer
1	172.18.0.3	59218

Verificar si la sesión actual usa TLS

```
16  -- VERIFICAR SI LA SESIÓN ACTUAL USA TLS
17  SELECT
18      ssl,
19      version,
20      cipher
21  FROM pg_stat_ssl
22  WHERE pid = pg_backend_pid();
```

Data Output | Messages | Notifications

Showing rows: 1 to 1 | Page No: 1 of 1

	ssl boolean	version text	cipher text
1	false	[null]	[null]

No es posible conectarse desde la terminal

```
================================================
      Bienvenido a la práctica de DBA - PostgreSQL
================================================

Para conectarte a tu base de datos, copia y ejecuta el siguiente comando:

   psql -h 192.168.200.100 -U  -d

------------------------------------------------

CT101:~$ psql "host=198.168.200.100 port=5432 dbname=db_20529211_angelica_camacho user=u_20529211_angelica_camacho sslmode=r
equire"
psql: error: connection to server at "198.168.200.100", port 5432 failed: Host is unreachable
        Is the server running on that host and accepting TCP/IP connections?
CT101:~$
```
